SAYFAGUARD™

SKYLIGHT COVER

SAYFAGUARD™

SKYLIGHT COVER

SayfaGuard™ Skylight Cover is a innovative and effective skylight protection system, ideal for roofs with fragile skylights. The system is available in standard sizes and can be installed in as little as four steps, ensuring a practical and labour efficient installation.

The unique tubular design allows for easy access to the skylight for cleaning and maintenance, whilst also maximising the amount of light that can reach the skylight.

STANDARDS

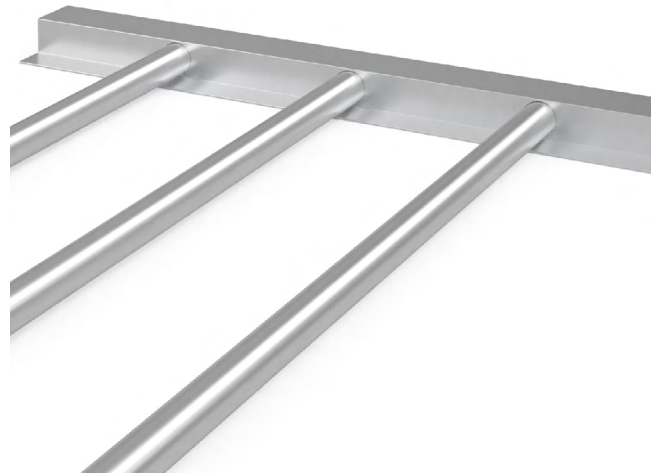

The system components and spacing conform to requirements set out in BS13700:2021 and the fixing flange/ framing base is designed to meet the load requirements of BS EN516:2006.

MATERIALS

All elements of the SayfaGuard™ Skylight Cover are manufactured from mill finish aluminium and secured using BULB-TITE blind rivets dome head 7.7 x 27.7 with water proofing EPDM.

SAFETY

The skylight cover is rated to a mass of 100kg suitable to prevent the fall of a single user through the system.

INSTALLATION

The system is modular, consisting of two core components, the base and restraining tubes. The restraining tubes are slotted in to the base, which is then directly fitted to the roof substrate.

APPLICATION

The system is primarily designed for installation to PMS roofs but can also be fitted to Concrete, and Steel substrate. Speak to our team for more details.

WARRANTY & MAINTENANCE

5 Year warranty as standard. 10 Year Sayfa+ Warranty, partner inspected and certified at 24 month intervals.

TESTING REQUIREMENTS

Recertification of this system is required to be performed by a competent height safety engineer. Environmental factors affect the recommended intervals for testing and inspection are as follows:

EN ISO 12944-2 C1 – C3 Environments : Intervals of 24 months.

EN ISO 12944-2 C4 – C5 Environments : Intervals of 12 months*.

*For these environments please contact Sayfa group for product finishing options
